

Name _____
Date _____

Coin Comparison

One way to learn from history is to compare things of ancient times, with things of modern time. Please compare your coin to a US quarter. Use the chart below to help you. You may want to compare the size, color, material, value, images on the coin, or anything else that may seem to be important. After completing the chart, please compose a four paragraph essay outlining the similarities and differences between the two types of coins. Your essay should have an introduction, a paragraph of similarities, a paragraph of differences, and a conclusion. It should be at least one page in length, include proper grammar, capital letters, proper punctuation, lots of details to support your ideas, and strong topic sentences. You may wish to have this proof read before submitting a final copy. You must turn in this sheet attached to the final copy of your essay.

Similarities	Differences
